

1. Download the certificate zip file:
https://www.newbedfordschools.org/UserFiles/Servers/Server_66938/File/Departments/Technology%20Services/NBPS-RootCA-2025.zip
2. Locate the downloaded Zip file, double click to unzip.

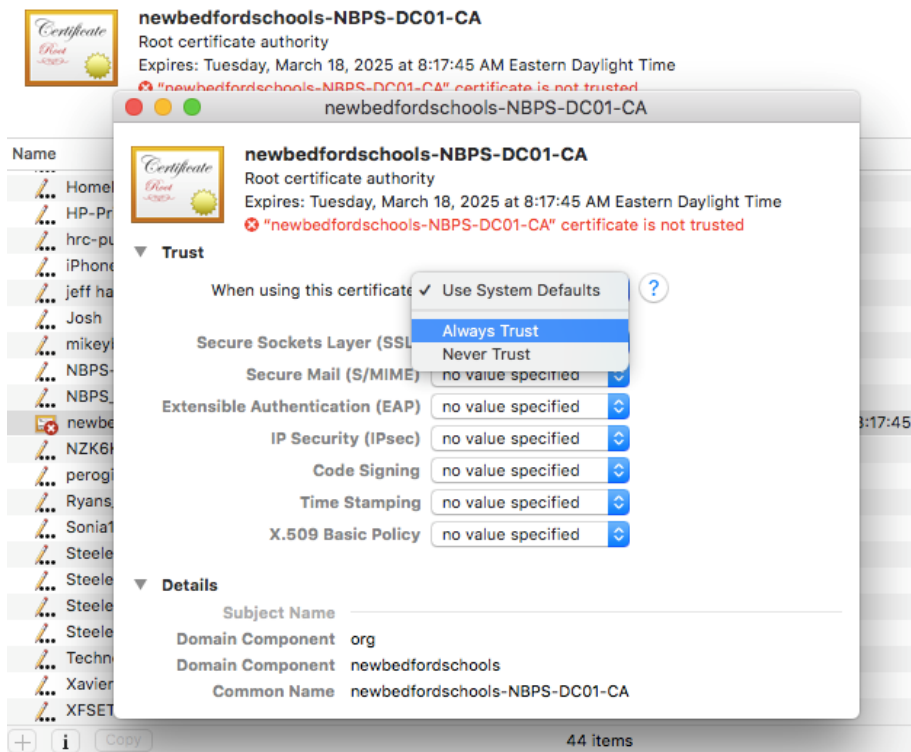

3. Double click the certificate to add to System Keychain. Change Keychain from “login/Local items” to **System** if not already selected.

4. Select 'System' in the left-hand column of Keychain Access window and locate the certificate.

- The certificate should now show with a red X. That means it is untrusted. To provide trust, double-click the **nbps-dc01-ca** certificate. Under "Trust", change the setting at the top (When using this certificate) to "Always Trust".

- The red X will disappear and the certificate will show a blue and white cross icon. This means the certificate has been trusted for all users on the device.
